## FULL-STACK SOFTWARE ENGINEER

Natural Problem solver on a mission to drive innovation and make a positive impact on the world through technology. With a particular love for designing, improving, and structuring frontend architecture, I also have skills to develop, maintain, and optimize RESTful APIs on the backend. As a past Supervisor and current Dealer in the casino industry, I have exceptional communication skills and thrive when it comes to working on a team. I believe these combined skills would make me a great fit for a developer role.

## TECHNICAL SKILLS

Stack - Javascript, React, NodeJS, Express, TypeScript, Ruby, Ruby on Rails, Python, Flask, SQL, SQLite

Design - Bootstrap, Figma, Adobe creative suite, Shadcn, MaterialUI, Tailwindcss

Tools - Redux, React-router, Vite, Webpack, VsCode, Git, Github, Linux, npm, pnpm, yarn

## TECHNICAL PROJECTS

**ugliboats.com** - [Github](#) | [Live site](#)

Freelance job for boat enthusiasts. Live website that lets a user upload their build for show and sale.

- Built a CMS from scratch to use in an Admin Panel for full content control by the owner.
- Created React-TypeScript-Tailwindcss Frontend to modernize site while managing design preferences from client.
- Generated a Node.JS database with SQL to create an API and implemented BCrypt for security.

**checkoutden.com** - [Github](#) | [Live site](#)

Marketplace for creators of digital products with no distraction, one click buy marketing. Freelance job still in development.

- Collaborated with client to make a no distraction, one click away webpage for buying digital products.
- Implemented a ReactJS frontend with React-router to handle multiple pages. Used Tailwindcss for styling.
- Planning to create a Web page builder within the site, so that users can manage themes and content of their choice.

**WeStay** - [Github](#) | [Demo](#)

Allows a user to save Airbnb, vrbo, ect.. with links to their respective pages.

- Built a React.js frontend with Bootstrap to create a user friendly experience.
- Implemented a database with Ruby on Rails that uses ActiveRecord and SQL for an API with BCrypt for security.
